Conferences at
Fontainebleau

organized by
Sergey VERLAN
during the last week of June 2018

UCNC 2018

17th International Conference on Unconventional Computation and Natural Computation

June 25-29, 2018

Paper submission deadline: February 9, 2018

WMC at UCNC 2018

Workshop on Membrane Computing

June 25-29, 2018

Rudi FREUND & Sergiu IVANOV

Paper submission deadline: April 1, 2018

MCU 2018

8th Conference on Machines, Computations and Universality

June 28-30, 2018

Paper submission deadline: February 4, 2018

AND REMEMBER:

UCNC 2020, CMC 2020, MCU 2020

will take place in

Vienna in August 2020

☺ Some provocative ☺ thoughts on the future of P systems

P ikipedia

„NEW Handbook on Membrane Computing"

not as a book on paper, but as a
dynamically evolving online collection of
state-of-the-art best results on
well-known topics (like SNPS, symport/antiport)
and new ideas

paper books remain „static" anyway,
online books can be dynamically evolving and
be used FREELY by everybody without paying

P in the loop

„human in the loop"

interaction of human(s) with machines in *hybrid systems* for knowledge representation, acquisition, simulations, etc.

P in the loop

variants of P systems being part of
hybrid systems for specific applications

take the best of all worlds

not everything in a hybrid system needs to be P
use suitable variants of P systems, but also use
best known solutions for specific sub-problems

P in the loop

variants of P systems being part of
hybrid systems for specific applications

take the best of all worlds

not everything in a hybrid system needs to be P
use suitable variants of P systems, but also use
best known solutions for specific sub-problems

May the force be with P !
